GitHub RepoSearch App using GitHub API

This is a simple project which I built while learning API requests using React and GitAPI . It provides Search-bar to search for repo using repo-name and display result. You can click on results to get more details and link to the git-repo and git-owner.

Online Job Portal

This is a college project which is built using PHP HTML CSS and JavaScript. MySQL is used as the database. The objective was to allow freelancers to find jobs easily and apply for it. It provides a interface for employers to add jobs and freelancers to apply for it.

<https://github.com/Sumir123/OnlineJobPortal>

Simple Blog Site

This is my first Web Project which is built using Python framework Flask . MySQL is used as the database. It provides a interface for users to signup and login to post blogs. It can perform CRUD operations.
