Sumir Bhandari

Full Stack Developer

Swayambhu, Kathmandu • 9804440233 • sumir.bhandari11@gmail.com

LinkedIn | GitHub | Portfolio

A passionate and self-motivated individual with a strong foundation in computer application studies and a passionate self-learner in the field of web development, my goal is to excel in the world of technology. I aspire to become a highly skilled and versatile full-stack developer, capable of contributing effectively to both frontend and back-end development.

EXPERIENCE

React Intern   Kathmandu

Grepsr   Jun 2023 - Aug 2023

During my React internship, I worked on an internal project, focusing on frontend logic and UI development using React and Next.js. Jira's Kanban sprint method was used for task management and collaborated with the team lead to deliver responsive, interactive interfaces. This experience enhanced my skills in React, Next.js, and cross-functional teamwork.

EDUCATION

Bachelor of Computer Applications (BCA)   Kathmandu

Prime College   Sep, 2019 - Present

SKILLS

Front-End: HTML5, CSS3, React.js, Next.js
React Packages: Zustand, Redux Toolkit, Formik, Yup, Axios, React Query, React Apexcharts
Back-End: Node.js (Express.js, Mongoose, jsonwebtoken, Passport.js, Sequelize), Python
Databases: MySQL, MongoDB, PostgreSQL
Tools: GitHub, Jira, Docker
Other: Familiarity with REST API, Good Problem-Solving Skills

PROJECTS

Rojgar (Online Job Portal)

Rojgar is an online job portal built with Next.js and FastAPI. It provides a user-friendly interface for both employers and job seekers. The key differentiator of Rojgar lies in its content-based filtering algorithm, offering a personalized job-hunting experience.
GitHub Repository

User Authentication

This project highlights a secure user authentication system implemented with Passport.js. Complemented by a sleek EJS-powered view, the application features protected routes, allowing access only to authenticated users.
GitHub Repository

NEXTSHOP (E-Commerce Web App)

NEXTSHOP is an e-commerce web application built with React.js (Next.js). Dummy JSON authentication and product API were integrated. Zustand is used as a state management solution.
GitHub Repository

GitHub RepoSearch App using GitHub API

This is a simple project, which I built while learning API requests using React.js, and GitAPI. It provides Search-bar to search for repo using repo-name and display result. You can click on results to get more details and link to the git-repo and git-owner.
